Rockville, MD 20852

Dear Sir,

I would like to express my very strong opposition to the rules and guidance that the FDA is proposing on the subject of genetically engineered foods.

I think that the idea of voluntary labeling is completely inadequate and should be abandoned in favor of MANDATORY labeling of all genetically engineered foods and food ingredients.

I also strongly believe that the safety of genetically engineered foods is still very much in question. There should be a general moratorium on their use until their impact on the environment and on human health has been further studied.

Sincerely,

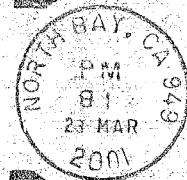

Susan C. Robinson M.D., F.A.C.O.G.
