Members of Professional Activities Committee:

I have had several conversations and meetings with Dr. Williams, one of you who have met him sep. he is simply a great person and obviously plans to (and undoubtedly will) become a valuable member of the medical community - contributing to our medical community and the community at large, greatly.

I think it is a wonderfully innovative proposal. I was a member immediately prior to joining my profession. I think the PAC and Dr. Parker for allowing this as a way to help the medical staff (specifically in the area of obstetrics) in the process.

I offer to allow Dr. Parker to assist in any way that I can allow him to become a valuable member of the medical community and social environment including but not limited to would then report to the PAC any observations that I have over time.

I have discussed this with the faculty of the Department of Obstetrics & Gynecology (Dr. McDonald, Dr. Reed) who have agreed to support this proposal.
