-
- December 2017 *A Patient at Brigham and Women's Hospital*
Dr. Braaten was incredible, as was her staff. While the procedure I was having done was very painful, Dr. Braaten and the staff were so kind and considerate and I could tell that they genuinely cared about my well being. I felt incredibly cared for.
- December 2017 *A Patient at Brigham and Women's Hospital*
I felt a bit intimidated by the provider. She's clearly extremely bright. But there was no warmth there.
- December 2017 *A Patient at Brigham and Women's Hospital*
Dr. Bratten may work for some but I personally feel we're not a good pair. I would have liked for her to listen more and been open to a holistic approach regarding my issue opposed to using medicine as a band-aid. Also - I'm overweight. I am actively working on tackling my weight issue but that seemed to be of little concern for Kari.

A Patient at Brigham and Women's Hospital

December 2017 Kari took time to explain and was terrific during the procedure.

A Patient at Brigham and Women's Hospital

November 2017 This was my first time seeing Dr. Braaten, to discuss a personal, and somewhat awkward issue. She was incredibly professional and easy to talk to, and I felt totally comfortable with her. She answered all my questions and discussed a variety of solutions with me. I appreciated how thorough she was and knowledgeable she seemed. I would 100% continue to see her if/when needed and recommend her to others.

A Patient at Brigham and Women's Hospital

October 2017 I felt that I was not listened to. I was offered a solution that I was not okay with. I was not even physically examined during my time. I wasted 2 hours getting to this appointment and I am truly disappointed. I will not be back.

A Patient at Brigham and Women's Hospital

October 2017 Dr. Braaten is AMAZING! she always makes me feel so comfortable and at ease. She's a wonderful doctor who genuinely cares about her patients. I have recommended her on many occasions and will continue to do so. she's the best!

A Patient at Brigham and Women's Hospital

September 2017 I really love the doctor's and staff at the Fish Center.

A Patient at Brigham and Women's Hospital

September 2017 I had an endometrial biopsy that was not scheduled, Dr. Braaten explained the benefit of doing the biopsy and was fantastic during it. She talked to me and made a painful procedure possible. Very compassionate. First time meeting Dr. Braaten and felt very confident.

A Patient at Brigham and Women's Hospital

September 2017 It is weird that after the hysteroscopy they still don't know the location and dimensions of the polyp and will perform another similar investigation during or after the start of surgery???? No wonder why the cost of medical procedures is so high. I also expected the anesthetist to discuss with me any concerns during this visit, not on the day of surgery, 1 hour before it.
