SUBJECT: State Licensure Survey Findings for Above-Referenced Agency

Dear Shelly Miller:

A post licensure state survey was conducted on May 29, 2015 and completed on June 12, 2015, at Scotsdale Women's Center, located at 19305 West 7 Mile Rd., Detroit, MI, 48219.

Participants included:

- Shelly Miller, Executive Director, Scotsdale Women's Center
- Robert Egan, MD, Scotsdale Women's Center
- Pam Lindsey, RN, State Health Care Surveyor, MDLARA
- Andrew Schefke, State Health Care Surveyor, MDLARA

Findings included evidence that facility administrators were in the process of completing an investigation regarding recently identified issues related to the narcotic count process. The facility was allowed two weeks to complete their investigation, initiate corrections, and make any necessary process changes.

A completion survey was conducted on June 12, 2015. Facility's investigation revealed mathematical errors in log, with no evidence of diversion of medications. Facility has instituted a new process for counting, & documenting medications. Additionally, an education and an audit process have begun. Verification of efficacy will occur during the facility's next annual survey.

Upon continued implementation of these plans the facility will be in compliance with MCL 333.20801 through 333.20821 and/or the Michigan Administrative Rules for freestanding surgical outpatient facilities R325.3801 through R325.3877.

Verification of corrections will occur during the facility's next state survey.

Andrew Schefke, Surveyor
