

Abortion Care

Our physicians offer expert and compassionate abortion services in a supportive and comfortable environment.

What to Expect

The decision to end a pregnancy is often complex, and our staff at PEACE respect and care about your individual circumstances. The entire team will ensure that you get the best, safest care available.

We focus not just on your medical care but also on your emotional needs. We have resources available for managing the range of emotions you may feel before and after your procedure.

Because we are part of the hospital, we're able to treat patients with complex medical conditions who are unable to be seen at out-patient clinics. If you've been referred to us because of a health concern, for you or your pregnancy, you can be assured that we will be able to treat you safely here in our Center.

Services:

- Medical & Surgical Pregnancy Termination
- Patient Centered Pregnancy Options Counseling
- Post Pregnancy Loss Counseling & Referrals
