Hospital Affiliation

- University of Colorado Hospital

Clinical Interest for Patients

Dr. Guiahi has a special interest in providing contraception for women with complex medical conditions. She enjoys being able to help patients with their health and reproductive goals throughout the spectrum of OB/GYN care – from family planning to general health and pregnancy.

Care Philosophy

Dr. Guiahi is a personable physician who takes patients' concerns seriously. Her approach to treatment is conservative, often recommending less-invasive therapies and treatment first before exploring more complex procedures. However, she discusses all of the options that are available, and believes the best therapy is the one her patient is most comfortable with.
