Re: Response to Your Request for Information Disclosure (Self-Query)

The enclosed information is released by the National Practitioner Data Bank (NPDB) for restricted use under the provisions of Title IV of Public Law 99-660, the Health Care Quality Improvement Act of 1986, as amended.

Title IV established the NPDB as an information clearinghouse to collect and release certain information related to malpractice payment history and professional competence or conduct of physicians, dentists, and other licensed health care practitioners. Regulations governing the NPDB are codified at 45 CFR part 60. Responsibility for operating the NPDB resides with the Secretary of the U.S. Department of Health and Human Services (HHS), HRSA, Division of Quality Assurance.

Reports from the NPDB contain limited summary information and should be used in conjunction with information from other sources in granting clinical privileges, or in making employment affiliation or licensure decisions. The NPDB is a flagging system and a report may be included for a variety of reasons which do not necessarily reflect adversely on the professional competence or conduct of the subject named in the report.

All information received from the NPDB is considered confidential and must be used solely for the purpose for which it was disclosed. ANY PERSON WHO VIOLATES THE CONFIDENTIALITY PROVISIONS AS SPECIFIED IN TITLE IV OF PUBLIC LAW 99-660, AS AMENDED, IS SUBJECT TO A CIVIL MONEY PENALTY OF UP TO \$11,000 FOR EACH VIOLATION. Subjects of reports who obtain information about themselves from the NPDB are permitted to share that information with anyone they choose.

Re: Response to Your Request for Information Disclosure (Self-Query)

The enclosed information is released by the Healthcare Integrity and Protection Data Bank (HIPDB) for restricted use under the provisions of Section 1128E of the Social Security Act.

Section 1128E was established by Section 221(a) of Public Law 104-191, the Health Insurance Portability and Accountability Act of 1996, as amended. The statute established the HIPDB to combat fraud and abuse in health insurance and health care delivery and to improve the quality of patient care. The HIPDB serves as a source of final adverse action information on health care practitioners, providers, and suppliers, collecting and releasing information related to adverse licensure actions, health care-related convictions and judgments, exclusions from Federal and State health care programs, and other adjudicated actions or decisions. Responsibility for operating the HIPDB resides with the Secretary of the U.S. Department of Health and Human Services, Office of Inspector General, and HRSA, Division of Quality Assurance. Regulations governing the HIPDB are codified at 45 CFR part 61.

Reports from the HIPDB contain limited summary information and should be used in conjunction with information from other sources in granting clinical privileges or making employment affiliation, contracting, or licensure decisions. The HIPDB is a flagging system and a report may be included for a variety of reasons which do not necessarily reflect adversely on the professional competence or conduct of the subject named in the report.

All information received from the HIPDB is considered confidential and must be used solely for the purpose for which it was disclosed. Subjects of reports who obtain information about themselves from the HIPDB are permitted to share that information with anyone they choose.
