I highly do not recommend this place . It reminded me of a animal clinic , it even smelled like one . When you first walk in you think it's okay because you see all the girls in the waiting room waiting , scared , crying , nervous, just like you feel so you think you aren't alone. But then when you get into the back, they take you back like three different times to do different things. The " nurses & doctors " or whatever you would like to call them were in professional . Honestly I would never call them nurses. Especially the doctor all he was after was money & hurrying so other girls could come right in & get there's done also. When you get their they make you pay & they don't have no computer system just a crappy room that you sit in while they are eager to take your money. Then they make you sit in the waiting room for almost an hour , then they take you back and two ladies that had no compassion on why you were there take your blood and then they send you for an ultra sound in a room that is so crappy I felt like my dog should have been on that table getting checked not me.. Then after that the doctor is ready for you . & he is in a hurry . Once you are in that room it is something you will never forget. As you lay on the table.... You see all the other girls dead babies blood seeping through the blue cloth that they put them on. The doctor doesn't speak one word to you he just goes and does what he has to do. You don't have the choice to be put to sleep... You hear everything from the Machine he uses... Which actually broke when they went to do mine. The doctor left after he did what he had to do and as I was laying on the table, the nurse cleaned up & the doctor came in several times asking her if she was done yet he had other patients . Nobody had any sympathy there. Not that I was looking for any, but nobody was nice.. They just wanted your money. & I gotta live with my mistake I made everyday. Hearing that machine... Seeing other babies blood... I just wanted to tell my story so hopefully people who see this do not go there. It is scummy and honestly if you are thinking of having an abortion .. Please think twice... I regret everything I did. 🍷

THE WORST medical experience of my LIFE. DO NOT SUPPORT this clinic!

The nurses were rude and uncaring. The doctor, if that's what you even want to call him, was unprofessional and rushed for time. He showed no compassion for the patients. All he was concerned with was his turnover rate and when he was getting out. "Quickly! Quickly I have places to be after this, I don't have time for this" he shouted to the nurses to get the girls in and out as fast as possible. If you are in such a hurry then why are you even in this profession? The whole staff seamed so unorganized and out of the loop. No one knew what was going on. They never informed you what was happening next, so you just had to wait anxiously until they called your name.

The facility is dirty and beyond it's time. It felt like I was sitting in an old dusty school. The sink in the ultra sound

room looked like there had been blood or fluids splattered on it and then barely wiped clean. The equipment and instruments look old and outdated. The moment you walk in it looks and feels unprofessional.

I felt uneasy the whole time I was in there but I kept telling myself it will be okay this must be how all abortion clinics are(since this was my first experience ever in one). The only time I felt okay was when I was in the last waiting room with the other girls waiting for our procedures. The other girls gave me more comfort than any staff in that building. You could even hear the D&C machine running from the waiting room. Not something you want to hear as you are about to get this procedure.

I ended up leaving and going to a much better facility in Pittsburgh, Pa. I had such a better experience in Pittsburgh. PLEASE LADIES DO NOT SUPPORT THIS CLINIC. You will be better off emotionally and physically! I hope this helps someone so they don't have to go through this nasty experience here. There are far better clinics in Pennsylvania. Much love! you are not alone in this. <3

This place is awful. Absolutely no compassion for the patients. Staff was rude and was talking about each and every woman that was there after they went back. Absolutely nasty old women. During counseling they rolled their eyes at every question I had asked. Doctor didn't speak English well and just an overall terrible place. I saw everything. The doctor laid out what was removed on a table in front of my poking at it... I am mortified and I will never get the images out of my head.

This place will not give you the information you need before having an abortion. Their "counseling" consists of a doctor who can barely speak English describing what will happen. The staff is friendly but very un knowledgeable. They do not do follow up with their patients, leading to many emotional difficulties after. They even will accept clients who are pushed through the doors by a man, crying... and take her through the process. I do not recommend this place to any woman looking to have an abortion. The experience was traumatizing.
