## Abortion Services in Gaithersburg, MD

- abortion pill (medication abortion)
- pre- and post-abortion patient education
- post-abortion follow-up exams
- referrals for other abortion services, as needed

## Here's what you need to know about abortion services at this health center:

### Abortion Pill (Medication Abortion)

Abortion pill (medication abortion) is offered up to 9 weeks and 0 days after the start of your last menstrual period. If your last period was more than 9 weeks ago, we can still help. Call us for a referral list of health care providers in your area that offer other abortion services.

Abortion pill (medication abortion) services are available by appointment only.

Plan to be at the health center for 4 to 6 hour(s) for your entire abortion pill visit (medication abortion).

You will need to follow up within 1-2 weeks to make sure your abortion is complete and that you are well. In the unlikely event that you are still pregnant, you may need another dose of medication or to have an in-clinic abortion to end the pregnancy.

After your abortion pill visit, you will need access to a telephone, transportation, and backup medical care available
