Bryant, Dorothy

Dorothy had an abortion performed by Dr. Robert Prince at Dallas Medical Ladies Clinic on May 27, 1986. Dorothy had a history of chronic lung problems that according to the defense in a lawsuit that was filed, she did not tell the clinic about. Dorothy's mom stated that the clinic was aware of her pre-existing condition but disregarded it. Dorothy began having problems after the anesthesia was administered and was transferred to Parkland Memorial Hospital in Dallas, Texas where she died that day. She left behind one daughter. (Dallas County (TX) District Court # 88-1642)
