Center for Reproductive Health

The Christiana Care Center for Reproductive Health specializes in innovative contraceptive techniques and provides comprehensive reproductive health services, especially for patients with complex medical issues. Our expertise and access to research and technology enable us to provide many women's health services that are not widely available in Delaware.

Our services include:

- Comprehensive family planning.
- Pregnancy testing.
- Pregnancy options counseling and surgical services.
- Counseling on emergency contraception.
- Adolescent reproductive health care.
- Management of miscarriage and fetal anomaly.
- Sterilization services, including tubal ligation and tubal occlusion.

Comprehensive birth control counseling

We offer a wide range of contraception options and can match the best method of contraception to your medical and social needs. In addition, we specialize in contraception consultations for women with serious medical conditions.

Confidential, safe, welcoming

Your privacy is important to us. We are located steps away from the main hospital at the Christiana campus, and services are available by appointment. Our office provides an intimate, confidential, welcoming atmosphere that emphasizes dignity and respect for all women. We provide comprehensive counseling for patients considering pregnancy and contraception options.

Nationally recognized

Health education event for deaf and hard of hearing women connects and empowers

Hey, dads! Are you ready for Boot Camp?

We were selected as the first U.S. community hospital and the only hospital in Delaware to be designated as a Kenneth J. Ryan Residency Training Program Site. This program enhances family-planning training for obstetrics and gynecology residents in the U.S. and Canada.

Financial assistance is available

We accept all major insurance plans, and we offer financial assistance to uninsured or underinsured patients. Our practice has access to the Justice Fund, which provides partial financial assistance, based on a formula tied to the federal poverty level, to women who are unable to pay fully for their care.
