Practice Locations

University of Colorado Hospital (UCH)

12605 E. 16th Ave
Aurora, CO 80045
720-848-0000

Hospital Affiliation

- University of Colorado Hospital

Specialty Information

Specialties

- Obstetrics and Gynecology

Clinical Interest for Patients

Dr. Cohen chose obstetrics and gynecology as her medical specialty because she is passionate about helping women through their reproductive years. Having the ability to support women during important decisions, whether it be birth control or pregnancy, is a true honor for Dr. Cohen. Women often feel isolated because reproductive health is not talked about openly. Dr. Cohen strives to remove this stigma by taking time to ensure that each patient feels comfortable with her care and that all concerns are addressed.

Care Philosophy

When it comes to caring for patients, Dr. Cohen is compassionate and nonjudgmental. She believes that each of her patients is unique, but wants them to know that they are not alone.
