About the Program

The Department of Obstetrics and Gynecology at The Ohio State University Wexner Medical Center considers the education of our residents to be one of our most important responsibilities. We are proud to have faculty clinicians and investigators who have been widely recognized for their teaching skills.

Our residents are part of The Ohio State University/Mt. Carmel Health Integrated Training Program in Obstetrics and Gynecology. This exciting program offers the best of two worlds – the strength of a large academic medical center and collaboration among leading community hospitals.

Our fully accredited, four-year residency program consists of 44 residents, who participate in clinical activities at three sites: The Ohio State University Wexner Medical Center, Mt. Carmel West Hospital and Mt. Carmel St. Ann's Hospital.
