An Autumn Gathering Harvests Knowledge about Valley's Neuro-Oncology Program

On Tuesday, October 4th, Susan and Victor Wortmann graciously hosted an event for The Valley Hospital Foundation at their warm home in Saddle River. At this delightful reception, members of Valley's leadership staff revealed the latest vision and direction of the Neuro Oncology Program, as well as some key achievements for Valley's oncology service.

"Valley's Institute for Brain and Spine Radiosurgery houses our Gamma Knife Center where our experts treat brain metastases and spine lesions with the fastest and most accurate machine available in the United States, the Gamma Knife Perfexion," stated Audrey Meyers, President and CEO of The Valley Hospital and Valley Health System. "This noninvasive tool involves no incisions at all, and yet yields the best outcomes for hard-to-treat or inoperable cases."

Dr. William Cobb, Director of Neurosurgical Oncology, presented a comprehensive overview of the remarkable achievements taking place within Neuro Oncology at Valley.

Audrey Meyers, Vic and Susan Wortmann, William Cobb, M.D.

William Patterson, Cecily Palludan, Diane and Gerald Bedrin

Paula D'Amico, Vic Wortmann, and Theodore D'Amico

Julie Karcher, Carmel Falcone and William C. Cobb, M.D.

Susan Wortmann, Terry O'Connor, Thomas O'Connor, and Ilene Crocco

Keith Gresham, M.D., Joan Gresham, Catherine Mersen, and Thomas O'Connor
