I had a bad experience at this place BECAUSE OF THE DOCTOR. The doctor that does the procedure that is for people that are 16 weeks, he is a young white man with blonde hair. HE IS A RUDE INCOSIDERATE UNPOLITE AND MEAN PERSON. He asked me if I was using birth control previously and when I said yes, he refused to believe me. He made me feel horrible. Its not his place to judge. He is the one performing the procedure so if Im horrible for doing this, so is he. He needs to shut up and do what he is paid a lot of money for. Get rid of him! The nurses are great, this doctor not so much. There is another doctor, a Hispanic doctor that is nice, but dealing with this doctor, made me feel like I was dealing with the devil's spawn. I will not be back here, hopefully ever again.

First to Review

I hated this place!!! I've actually been there before and what very pleased with my treatment from beginning to end. The assistants were very helpful and made me feel comfortable. The doctor was quick and efficient but he also made me feel at ease. Idk what happened this time around. The assistants were again very nice until I got to the procedure. This was now a different dr and he was very rude and impatient. I heard the assistants saying he was ready to go and rushing people. They completed and ultrasound and I told them I was 11 weeks. His assistant couldn't even perform the ultrasound so he took over it's an attitude. He then told me I'm 13 weeks and have to pay more. I immediately told him that's false. I know my cycle and I've also been to 3 doctors previously due to complications and all ultrasounds confirmed I was 11 weeks. He told me I can take that up with the other dr but he's the only one here so either I pay more or don't do it! I gave the nurse the extra money and just proceeded with the procedure. I just wanted to get things over with. Then he tried to give me the anesthesia. I told him how hard it is sometimes to find my veins and even showed him areas where they usually draw from. He told me to be quiet he knows what he is doing! Again another rude statement. He stuck me twice and proceeded to tell me it's my fault I kept moving. Not once did I move. Even when I said "ouch" normal reaction, he told me I can't speak. I started to feel the medicine and of course he lost my vein after I told him not to stick my hand because it won't stay. Next thing I know I woke up in recovery with a nurse telling me the doctor left for the day and he could not do it because I moved too much. Now explain to me how can I move if I am sedated? I checked the time and I was asleep for 10 mins. There were 3 females behind me. So the dr left

already???? And of course they charged me \$150 plus the extra \$50 for being 13 weeks and they did nothing. They refunded not even half my money and told me to come back. I have a business trip starting the following day and I would be gone for almost a month. That's more money for something that could've been done if he would've followed directions. Now it's after their Saturday business hours. They just rushed me out of there no assistance anything. I'm groggy and can barely walk because again I have anesthesia in my system. Never again!!!! I deliberately came to this facility because I felt at ease the last time. Now if they didn't have my initial money I wouldn't return. Disgusted by this dr. I wish I could remember his name. Disgusting human being.
