Family Planning Fellowship

We offer exceptional opportunities for highly motivated obstetrician/gynecologists to become future leaders in any aspect of the field of family planning. All training programs in the Department of Obstetrics and Gynecology strive for excellence in clinical care, education, and research.

The Family Planning Fellowship offers trainees a rich mix of both hands-on clinical experience and quality investigative exposure. Fellows develop outstanding clinical skills, superb teaching abilities, and make significant contributions in research.

While excellence is expected in these three areas, the faculty understands that each fellow will have unique career aims. Our program is flexible, creating the ideal training experience for each fellow to expand reproductive options for the population fellows will eventually serve. Our rapidly growing program offers unique opportunities and responsibilities for fellows.
