About

Technically and medically astute Healthcare Professional with a proven track record as both a Chief Informatics Officer and Physician with a focus on improving quality of care and overall patient experience. Consistently targets new methods to serve patients and healthcare teams through technology integration and deployment, operational assessments, and data aggregation. Collaborative mentor and leader with the ability to interface with multiple disciplines of the health care team to drive actionable changes.

Experience

•

Staff Physician

Planned Parenthood Great Plains

Mar 2019 – Present 10 months

Wichita, Kansas

Provides sexual and reproductive health services and primary care consultations for mid-level providers. Offers consultation for state and national policies for reproductive issues and policies.

- Decreased patients' length of stay by 50% through the execution of patient intake operations assessments to target areas of improvement and the employment of workflow mapping.

•

Chief Informatics Officer

Robert J Dole VA Medical Center

2017 – 2018 year

Wichita, KS

Assessed system workflows and processes to target recommendations to improve staffing and patients flows and emergency coordination.

- Drove building efforts that validated and implemented physician-related components of the Electronic Health Record (EHR).
- Chaired the Medical Records and Informatics Committees, a multidisciplinary group that assessed medical record compliance and employs technology to improve patient care.
- Introduced new provider templates that reduced charting times.
- Audited and redesigned new building operations to design improved workflow efficiency.
- Ensured facility was in compliance with national guidelines through the development of an updated medication reconciliation process.
