Understanding more about abortion

There are two different types of abortion available in the United States. These include in-clinic, surgical abortion and the abortion pill (medical abortion / RU486). Abortions are very common. In fact, 3 out of 10 women in the U.S. have an abortion by the time they are 45 years old. If you are considering whether this option is right for you, there are many things that you most likely have to consider. Finding out the facts about abortion can help you with making your choice.

If you are under 18, Maryland requires that one of your parents be told of your decision before your abortion. A doctor can excuse you from this requirement. Learn more about parental consent for abortion.
