

MEDICAL MALPRACTICE CASES AGAINST DR. JEFFREY D. GLAZER
INDIANA MEDICAL LICENSE #1045854A

Robin S. [REDACTED] v. Jeffrey Glazer M.D. Date of claim: 1/10/2003. Date of closure: May/2003. Outcome: Summary judgment in favor of Dr. Glazer. Case Summary: The patient had her baby delivered by Dr. Glazer who was on call for her obstetrician. The baby did well and she filed a suit four years after delivery, for unknown reasons. She would not answer requests for interrogatories or requests to schedule a deposition, and the courts awarded a summary judgment in my favor.

Lisa W. [REDACTED] v. Jeffrey Glazer M.D. Date of claim 1/6/2006. Date of closure: Feb/2007. Outcome: Dismissal with prejudice. Case summary: The patient underwent a laparoscopic tubal ligation at which time an unrecognized bowel injury occurred. She underwent a bowel resection and made a full recovery. The patient withdrew her claim after discovery.

Teresa T. [REDACTED] v. Jeffrey Glazer M.D. Date of claim: 6/30/2004 Date of closure: Feb 2011. Outcome: Agreed settlement of \$20,000. Case summary: The patient developed diabetic ketoacidosis following a vaginal hysterectomy and may have suffered a myocardial infarction during that episode. The patient had been cleared and followed by both her endocrinologist and cardiologist (she had had previous myocardial infarctions). She made a full recovery and this settlement was made after 7 years.

Damita S. [REDACTED] v. Jeffrey Glazer M.D. Date of claim: 3/21/2006. Date of closure: Approximately April 2011. Outcome: Agreed settlement for the limits of my insurance policy for one case (\$1 million). Case summary: The patient underwent an abdominal hysterectomy, and had a prolonged slow recovery in the hospital, and when she developed worsening vital signs a large fluid collection was noted on CT scan. She was taken to the operating room where a presumed bowel injury was diagnosed and the patient was given a colostomy. She made a slow recovery but has recovered fully, but lives with her colostomy.

Brooke M. [REDACTED] v. Jeffrey Glazer M.D. Date of claim 1/22/2008. Date of closure: January/2010. Outcome: Directed verdict in my favor. Case summary: The patient was seen in 2004 with a large ovarian cyst, she underwent laparoscopy with a laparoscopic ovarian cystectomy and made a satisfactory recovery. She had follow up ultrasounds which showed the ovary was present, but when she developed a cyst on the other ovary, she underwent laparoscopy by a different physician. He did not see the ovary that I operated on, and told her it wasn't there. A suit was filed, and in discovery it was noted that the lawyer did not have an expert witness. After much time the lawyer still could not produce an expert witness and the case was dismissed with the above outcome. The lawyer appealed to the Court of Appeals and the Kentucky Supreme Court who affirmed

the opinion of the lower courts.
