## Clinical Quality Ratings

Healthgrades ratings show you how well a hospital performed in providing patient care. When receiving treatment for a specific condition or undergoing a specific procedure in the hospital, you want the best care possible. You lower your risk of experiencing a negative outcome by selecting a five-star hospital.

# Patient Safety Ratings

Patient safety ratings show you how well a hospital safeguards patients from potential complications. Look for hospitals that are rated "Better Than Expected" or "As Expected" to reduce your risk.

Rated  
**Better Than Expected**  
in 0 safety indicators

Rated  
**As Expected**  
in 7 safety indicators

- ✓ Death in procedures where mortality is usually very low
- ✓ Pressure sores or bed sores acquired in the hospital
- ✓ Death following a serious complication after surgery
- ✓ Collapsed lung due to a procedure or surgery in or around the chest
- ✓ Hip fracture following surgery
- ✓ Excessive bruising or bleeding as a consequence of a procedure or surgery
- ✓ Electrolyte and fluid imbalance following surgery

Rated  
**Worse Than Expected**  
in 6 safety indicators

- ✓ Catheter-related bloodstream infections acquired at the hospital
- ✓ Respiratory failure following surgery

- ✓ Breakdown of abdominal incision site
- ✓ Accidental cut, puncture, perforation or hemorrhage during medical care

**1** Event relating to foreign objects left in body during a surgery or procedure
