PRIVATE VIP ABORTION

We understand some women want an Expedited or Private VIP abortion experience.

Our **Private VIP Abortion** service offers the ultimate in privacy, efficiency and discretion. For an additional fee you will have exclusive use of the facility. You will be the only patient in the clinic and you will have the full staff including the gynecologist, anesthesiologist, registered nurse, and counselor for your care. Your guest will be allowed to be with you at all times, until you go to sleep for the abortion, and will join you for aftercare in the recovery room. The whole process should take under 2 hours. Please call for pricing.

The Private VIP Abortion service is ONLY available at our [Rockville](#) location.

Our **Expedited Abortion** service reduces the waiting time for your appointment. You will have your lab work, ultrasound, and consultation as quickly as possible. Depending on your choice of procedure your time in the office will be at a minimum. The fee for this is \$300 in addition to the procedure fee.

The Expedited Abortion is ONLY available at our [Rockville](#) and [Baltimore](#) locations.

Pregnancy Calculator

To estimate the length of your pregnancy, enter the first day of your last period and then press 'calculate'.

First Day of Last Menstrual Period:

 [Select Date](#) 

CALCULATE

Estimated Length of Pregnancy:

Estimated Conception Date:

Estimated Due Date:

The Pregnancy Calculator above is an estimation of weeks from reported last normal menstrual period and does not constitute medical advice. A missed period does not necessarily mean that you are pregnant, and having a period does not mean you are not pregnant. Only an exam, pregnancy test, or ultrasound by a physician can confirm pregnancy and approximate length of pregnancy. The calculator should be used as a guide only and should not be relied upon for weeks of pregnancy, conception date, or due date.
