

## Obstetrics and Gynecology

### Family Planning Program

#### Overview

#### Compassionate care for sensitive concerns

Reproductive health requires a caring, respectful approach. At Tufts Medical Center's Family Planning Program in downtown Boston, MA, we provide a full spectrum of comprehensive services, including:

- contraceptive management
- miscarriage management
- pregnancy termination
- sterilization.

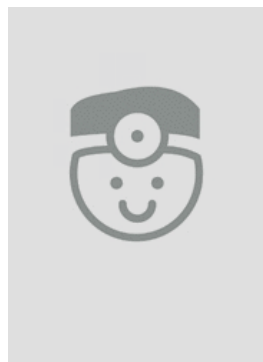

Our staff of skilled doctors and nurses in our downtown Boston office are here to offer support and expert guidance as you make the decisions that are right for you and your family.

#### A comprehensive program, led by Dr. Danielle Roncari

Led by [Danielle Roncari, MD, MPH](/physiciandirectory/danielle-roncari), our Family Planning Program has the resources you need with the privacy you deserve. We can help you choose from all currently available contraceptive methods, including Mirena and Paragard IUDs, and Nexplanon subdermal implants. We offer first and second trimester medical and surgical pregnancy termination, as well as treatment for miscarriage or fetal death.

Our staff also works closely with Tufts Medical Center's [Maternal Fetal Medicine](/patient-care-services/departments-and-services/obstetrics-and-gynecology/clinical-care-services/maternal-fetal-medicine) program to provide patients diagnosed with fetal anomalies comprehensive genetics counseling and guidance in planning future pregnancies. If you've decided your family is complete, we also offer the latest in minimally invasive sterilization methods, such as Essure and laparoscopic tubal ligation—all available in a safe, comfortable and confidential environment.
