**LIABILITY CLAIMS**

Some studies have shown that there is no significant correlation between malpractice history and a healthcare provider's competence. At the same time, the Legislature believes that consumers should have access to malpractice information. In these profiles, the Department has given you information about both the malpractice history of the healthcare provider's specialty and his/her history of payments. The Legislature has placed payment amounts into three statistical categories: below average, average, and above average. To make the best health care decisions, you should view this information in perspective. You could miss an opportunity for high quality care by selecting a healthcare provider based solely on malpractice history.

When considering malpractice data, please keep in mind:

- Malpractice histories tend to vary by specialty. Some specialties are more likely than others to be the subject of litigation. This report compares healthcare providers only to the members of their specialty, not to all their, in order to make individual healthcare providers history more meaningful.
- The incident causing the malpractice claim may have happened years before a payment is finally made. Sometimes, it takes a long time for a malpractice lawsuit to move through the legal system.
- Some healthcare providers work primarily with high risk patients. These healthcare providers may have malpractice histories that are higher than average because they specialize in cases or patients who are at very high risk for problems.
- Settlement of a claim may occur for a variety of reasons which do not necessarily reflect negatively on the professional competence or conduct of the provider. A payment in settlement of a medical malpractice action or claim should not be construed as creating a presumption that medical malpractice has occurred.

You may wish to discuss information provided in this report, and malpractice generally, with your healthcare provider. The Department can refer you to other articles on this subject.

The Health Department started getting reports for claims paid after May, 1998.

Settlements valued below \$75,000 for medical doctors and osteopathic physicians, \$50,000 for chiropractors, \$25,000 for dentists and \$10,000 for all other professions are not included here.
