

Antonio V. Sison, MD

Antonio V. Sison, MD, graduated cum laude from Princeton University. He completed his training in obstetrics and gynecology (ob-gyn) at Georgetown University School of Medicine, and in his last year there was appointed administrative chief resident. After completing his clinical training, he conducted several scientific investigations at the National Institutes of Health (NIH) as a research fellow in the areas of perinatal and pediatric infectious diseases. His

expertise and interest are mostly in this arena. He has published many scientific papers and ob-gyn textbook chapters in this field.

Sison was formerly the director of medical student education and associate residency director in a prestigious medical student and ob-gyn residency in Philadelphia. He has received multiple teaching awards, including the renowned APGO (Association of Professors in Gynecology and Obstetrics) Excellence in Teaching Award in 1995. He is now in private practice but continues to publish and give lectures. His most recent publication is "Teratogenic Viruses" (Chapter 22) in Medicine of

the Fetus and Mother (Lippincott-Raven Press). He is currently the ob-gyn residency program director and director of medical education at Albert Einstein Medical Center, an affiliate of Thomas Jefferson School of Medicine in Philadelphia, Pa.

His extracurricular interests are wildlife photography, scuba diving, underwater photography, and mountain climbing.
