### Division of Family Planning

Family Planning specialists utilize advanced and up to date techniques to manage complicated and at-risk family planning patients. These services compliment and collaborate with those of the Maternal-Fetal Specialists. These services may also include a variety of female sterilization methods. They also provide induced abortion services in the first trimester using medication or surgical aspiration, and in the second trimester using medical induction or dilation and evacuation up to 22 weeks of gestational age. Referral and consultation services are available to any medical provider with patients desiring access to a full spectrum of contraceptive services, who have medical concern about contraception, sterilization or require an induced abortion for maternal or fetal indications.

Our Family Planning Division participates in the Kenneth J. Ryan Residency Training Program.

This program strives to integrate and enhance family planning training for obstetrics and gynecology residents in the US and Canada.

#### Philip L Ferro, MD

315 464-4730

**Location:** Syracuse

**Hospital Campus:** Downtown

**Department:** [Obstetrics and Gynecology](#)

**Diseases/Specialties/Treatments:** Obstetrics and Gynecology; Contraception; Family Planning Counseling; Gynecologic Laparoscopic Surgery; Sterilization by Laparoscopy
