

About Coastal Women's Health

Here at Coastal Women's Health we are constantly striving to provide our patients with the latest information and advances in this ever changing field. Ever since opening our doors in 2007 our mission has always been to provide healthcare that exceeds expectations and usual standards for a rural community. With the support of our referring physicians and Grays Harbor Community Hospital we are able to achieve this goal.

From the start we brought evidence based medicine, incorporating the latest research, to both our obstetrical and gynecological patients. Dr. Martens is proud to provide his patients the latest in office testing and procedures centered on patient comfort and satisfaction. He also was the first OB/GYN to perform minimally invasive gynecological surgery in our area, in order to decrease hospital stays and patient post operative pain.

Dr. Martens is recognized as a field leader of gynecologic laparoscopy which has allowed him to be a pioneer in "Single Incision Laparoscopy." He is one of a very few surgeons nationwide performing hysterectomies through a small three centimeter incision in the abdomen. His practice also has an emphasis on treating female incontinence, which troubles an alarmingly high percentage of women.

In February 2010 we incorporated the latest in Electronic Medical Records, specifically for an OB/GYN practice, called Digichart. This system is allows patients to enter their own information and reason(s) for appointment through a special internet "portal" from home or work. With this feature it allows for a more accurate account of a person's history. This particular system also allows Dr. Martens to access information not just in his office.

Coastal Women's Health wants our patients to put their trust in us for their healthcare, which we take to heart. With this in mind, there are two providers that we trust with our patients in Dr. Martens' absence. These physicians is Dr. Nick Hallak of Hallak Medical Group on Sumner Avenue and Dr. John Eiland at the Montesano Clinic. Both Dr. Hallak and Dr. Eiland are highly skilled OB/GYNs and attentive physicians. Dr. Martens has worked together with Dr. Hallak and Dr. Eiland for a number of years and have excellent communication between their 3 practices.

We know that as a patient of Coastal Women's Health you will not be treated like a "number." On the contrary your care will be compassionate, professional; with the extra effort put forth that best suits your needs.
