

Embody Wellness is an office-based women's health practice proudly serving women in central Ohio. Dr. Patrick Muffley has over 15 years of experience in all aspects of women's healthcare. As he continues to offer his expertise in cutting-edge women's care, Dr. Muffley has now also turned his attention to the ever worsening drug addiction crisis confronting many women in our communities.

Over the past several years, Dr. Muffley has steadily become a recognized expert in the field of addiction medicine and the unique issues specific to women with this chronic disease of drug addiction. *Yes...a chronic disease.* We at Embody Wellness believe drug addiction is a chronic disease and not a result of poor moral fiber, a character flaw or personal weakness.

We believe that drug addiction should be treated like any other disease process – with proper technique, compassion and understanding. Unfortunately this philosophy is lacking in much of the medical community, but NOT at Embody Wellness. Come and experience the difference!

Embody Wellness values and respects your privacy and operates in a safe, welcoming, and non-judgmental environment. While there is no "quick fix" for this devastating affliction, there is treatment and HOPE. We care for many patients who have completely changed their lives for the better. We provide the latest therapies available in the form of office-based opioid addiction therapy to both *pregnant and non-pregnant* patients.

YOU are NOT forgotten!
YOU are NOT alone!
YOU ARE important and valued!
YOU ARE precious!
Let us tell you something
that could change your life...

Please call to find out more about our addiction program.
