

At the DuPont Clinic, we focus on your care. We strive to meet your needs as a patient and are committed to providing a welcoming environment with amenities such as special services, a nursing team, aromatherapy, and a team equipped with comfortable accommodations making travel

Our clinic is located in a discreet office building in the heart of D.C. Your privacy is important to us, and each patient has their own private room. There are no waiting rooms and no lines, so you will likely never see another patient. We firmly believe that access to abortion is a right for all people regardless of the reason behind their decision. We offer a non-judgmental, compassionate, and supportive space for people to receive high quality care.

Our Services

The Abortion Pill

We offer the abortion pill, also commonly known as medication abortion 10 weeks into pregnancy. If you have missed one or two periods, you can end your pregnancy with a medication abortion. This is a safe and effective way to end your pregnancy using a combination of misoprostol and mifepristone to induce a miscarriage in the comfort and privacy of your own home.

[Learn more about the abortion pill here.](#)

First Trimester In-Clinic Abortion

Many patients choose to end their pregnancy with a short and simple in-clinic procedure. This is a non-surgical abortion option that removes the pregnancy with light suction from a handheld manual device. The entire appointment typically lasts less than two hours, and the vast majority is spent in the privacy of your own patient room where your partner, family members, or friends may be with you. We offer sedation for patients who request it at no additional fee.

Abortion from 16-26 weeks

If you are between 16 and 26 weeks along in your pregnancy, we can provide you with abortion care regardless of your medical history, background or fetal indication. We do not require any particular "reason" to be seen here – if you would like to terminate your pregnancy, we support you in that decision.

This process will take two days.

Abortion after 26 weeks

If you are farther than 26 weeks into your pregnancy, we can still see you, regardless of your medical history, background, or fetal indications. We do not require any particular "reason" to be seen here – if you would like to terminate your pregnancy, we support you in that decision.

The process will take three days.

Our Providers

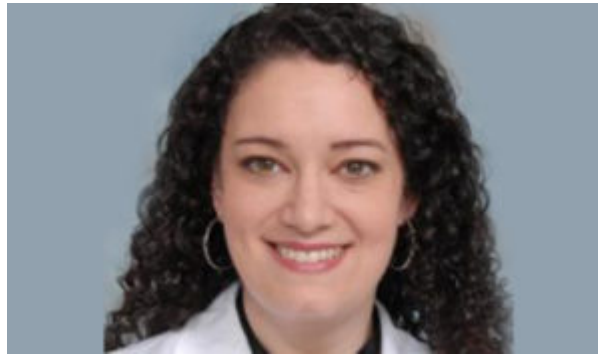

Matthew Reeves, MD MPH FACOG

Dr. Matthew Reeves is a board-certified obstetrician-gynecologist. Dr. Reeves attended Harvard Medical School and completed a residency in obstetrics and gynecology at the University of California, San Francisco (UCSF). Dr. Kuperstock is a board-certified obstetrician-gynecologist. Dr. Kuperstock attended Stanford University School of Medicine and completed a residency in obstetrics and gynecology at Beth-Israel Deaconess Hospital at Harvard Medical School. She then completed a Fellowship in Family Planning at Brigham and Womens Hospital at Harvard Medical School.

Morgan Nuzzo, CNM

Morgan Nuzzo is a certified nurse-midwife (CNM). She received her B.S. in Nursing from New York University, and her Masters in Science in Nursing from Frontier Nursing University. Prior to her role as a CNM at the DuPont Clinic, she worked as an RN at Planned Parenthood and other independent reproductive health clinics. Morgan is passionate about expanding the role of all clinicians across the sexual and reproductive healthcare spectrum.

Maritza Arias Basemore, MSA

Maritza Arias Basemore has worked in reproductive healthcare for more than two decades. Following her work as a division administrator at Columbia University Medical Center in Manhattan, Mrs. Basemore moved to Washington, D.C., where she managed the successful family planning practice at Washington Hospital Center. After years of planning, Mrs. Basemore co-founded the DuPont Clinic and continues to lead its ever-expanding team pioneering in patient-centered all-trimester abortion care. Mrs. Basemore is experienced in customer service, medical billing, human resources, and practice development and management. She has connections throughout the private-practice obstetric and family planning communities in Washington, D.C. and is known for her vibrant passion and exceptional patient care.
