When anti abortion folks are trying to shut down clinics now, this is what they are saying

You are mandated to stay pregnant, against your will, when everything from how this virus affects pregnancy to your financial future is unknown.

Keep. Clinics. Open. Period.

After lunch my coworker crawls around and eats the rejected food that he threw on the floor.

My coworker has no regard for community space. He trashes the break room everyday at lunch.

There's lots of talk that you can still be productive while working from home, but how do you focus when your coworker is shoving banana up his nose during your afternoon meeting?

My coworker requested and received a larger standing desk. He still has piles of reports haphazardly littering his office floor...

"Practice social distancing" may not be clear. "Stay home. Get groceries once per week" may be more clear. Messaging matters. #covid19 #SocialDistancing #StayHome

Prenatal care can be spaced out but not eliminated

Abortion can sometimes be safely managed by pills & telemedicine, access for which could be greatly expanded if all prescribers could write for mifeprax

LGBTQIA care can often be conducted by telemedicine.

Prenatal visits: essential, life-saving healthcare.

Abortion: essential, life-saving healthcare.

Trans / queer care: essential, life-saving healthcare.

SRH providers are essential, life-saving members of care teams during #COVID-19

In interest of saving time and water, my coworker and I have been showering together.

My coworker took things a step further and pooped in the shower yesterday.

This made me uncomfortable, and I've requested a meeting with the manager to discuss the issue.

I'm not actually working from home, but my partner is. This will be a thread of talking about our baby as if he is our coworker because his daycare is closed. #pandemicparenting #covid19 #workingfromhome

Here are some rules for social distancing that a lot of people don't seem to grasp:

1. DON'T GO TO YOUR FRIENDS HOUSE. PERIOD.

That means you can't have board game nights even if you're sat at other ends of the table. No coffee dates. Don't get together to sing some tunes.

My classmates and I are all out nursing this pandemic now.

We need you to stay tf home.

Only then can we can end this chaos.

Only then can we help train the nursing students who have had their education and graduation halted.

I vividly remember her mask-covered face peeking out of a dorm common area that had been converted into a quarantine space for students.

It was a strange time, but #COVID19 is even more surreal.

The #H1N1 crisis took place during my first year of nursing school.

I drove a classmate to urgent care to get tested.

Then I used her recording device to bring her the four-hour anatomy lectures she missed while in quarantine.

Abortion patients in Ohio wont stop needing an abortion because the clinics are closed. Instead, they'll be forced to travel out of state—hundreds of miles—in the middle of a pandemic, coming into contact with dozens of people. Closing abortion clinics is a public health fiasco.

ABORTION IS ESSENTIAL HEALTHCARE

People in Ohio are scared & being harmed because of this. A client drove 5 hours to receive essential care they should've been able to receive at home.
