- Dunkwu performed an abortion estimating the baby at 10 weeks. He believes he has perforated the woman's uterus by the large amount of bleeding, and has her transported to the hospital by a staff member. At the hospital he misdiagnoses her uterus for a fibroid, performs a hysteromy and removes a lifeless baby who turns out to be 30 weeks old. He failed to perform a sonogram before the abortion to confirm the age. Read details in the [Orders](#) filed by the Va Board of Medicine.
