Planned Parenthood abortionist – Partner had abortion patient die – testimony at Gosnell trial

Planned Parenthood Abortionist Charles Benjamin [testified](#) that he is one of about four abortion providers left in the city since Kermit Gosnell's arrest two years ago. Gosnell, 72, is charged with causing the deaths of a patient and seven babies who prosecutors say were born alive. Defense lawyer Jack McMahon has maintained that no babies were born alive.

Benjamin, who said he has performed 40,000 abortions over a 30-year career, testified Monday that he doesn't do them after 21 weeks, or three weeks under the 24-week limit in Pennsylvania. Benjamin also said he performs abortions after 17 weeks gestation in a hospital. That's in contrast to Gosnell, who performed about 1,000 abortions a year — virtually all at his clinic. He shows up on [Planned Parenthood of Southeastern Pennsylvania](#) financial reports in [2007](#) and [2008](#) and [2008 2009 2010](#) racking in hundreds of thousands of dollars each year from the tax funded Planned Parenthood abortion clinic.

On cross-examination, Benjamin did testify that his partner once had an abortion patient die of sepsis.

Who is Benjamin's partner?

Apparently Charles Benjamin testified that his "PARTNER" was involved in an abortion related death. Was that abortion death reported? Who is the abortionist "partner" who was involved in that death? Well...the media report linked [here](#) did not say.....but- records online with Planned Parenthood and the other clinic where Benjamin performed abortions gives us an indication who his many "PARTNERS" were:

One possibility is a doctor listed as board member of the clinic he works for. According to a 2010 [990](#) **Dr. Beverly M Vaughn , M.D.** is a **board member of Planned Parenthood** of Southeastern Pennsylvania. She has no complaints on file with the state, and we do not know if this is who Benjamin was referring to.

Another possible "PARTNER" is – **Lee Anthony Trip, MD** who was listed along with Charles Benjamin on the 2010[990](#) as a physician at

Section B. Independent Contractors

1 Complete this table for your five highest compensated independent contractors that received more than \$100,000 of compensation from the organization.

(A) Name and business address	(B) Description of services	(C) Compensation

CENTER FOR DISEASE DETECTION 3370 NACOGDOCHES RD 100 SAN ANTONIO, TX 78217	LABORATORY SERVICES	533,413
CHARLES BENJAMIN MD 310 WHITEPARK VALLEY ROAD FORT WASHINGTON, PA 19034	CONTRACT PHYSICIAN	329,810
RS ANESTHESIA SERVICES PO BOX 3140 AMBLER, PA 19002	ANESTHESIA SERVICES	289,925
QUINN CONSULTING ASSOCIATES LLC 658 FERNFIELD CIRCLE WAYNE, PA 19087	DEVELOPMENT SERVICES	138,000

2 Total number of independent contractors (including but not limited to those listed above) who received more than \$100,000 of compensation from the organization.

the Planned Parenthood clinic.

Trip earned a **whopping \$566,334 in ONE YEAR** working for the TAX FUNDED ABORTION GIANT !

Anthony Trip MD- who was employed by Planned Parenthood has a State Action on file – [read here](#) and at that time had performed over 8000 abortions. He dates back to at least **years** at the abortion giant's center. He has been raking in the BIG BUCKS \$\$\$\$ for years: ([2002](#) [2003](#) [2004](#) [2005](#) [2006](#) [2007](#) [2008](#) [2009](#) [2010](#)). Trip earned MAJOR BUCKS with the tax funded abortion giant each year!

Charles David Benjamin earned a **whopping \$329,810 doing abortions** for Planned Parenthood.

Apparently Charles Benjamin was involved in some sort of court case involving a teen who sued him, [in this CASE](#): Stephanie Carter v. Charles D. Benjamin, D.O. a teenager was transported across state lines for an abortion, and suffered issues of standard of care, informed consent, and psychological trauma following abortion. [here](#) – Stephanie Carter, at the age of 17 years, had the induced abortion performed by Dr Charles Benjamin. On the consent form, the words "breast cancer" did not appear. Stephanie Carter filed a lawsuit against Dr Benjamin alleging, in part, that Benjamin did not inform her of the breast cancer risks of that induced abortion.

And according to World Magazine, (*State of the states*: 1/10/2004), "When a Pennsylvania teenager , filed by Stephanie Carter, 19, of Hatboro, Pa, ("Sarah," as she was referred to in a lawsuit) became pregnant at 16, a high-school guidance counselor told her how to get around all that: All Sarah needed to do was cross the state line. The counselor then arranged for the teen a secret abortion in neighboring New Jersey, where no laws require parental involvement or informed consent. That was in 1998. In 2000, after being diagnosed with abortion-

related post-traumatic stress syndrome and learning that studies link abortion with breast cancer (ABC connection), Sarah sued abortionist Charles Benjamin and the Cherry Hill Women's Center in Cherry Hill, N.J. Her lawsuit alleged that Dr. Benjamin and his clinic should be held liable for violating Pennsylvania laws meant to protect her. In October 2003, on the eve of trial, the defendants settled out of court, agreeing to pay an undisclosed sum to cover Sarah's post-abortion counseling and future health care. Her parents, Harold and Marie Carter, already have settled a lawsuit against the Hatboro-Horsham School District. They claimed that her guidance counselor advised her to get an abortion in suburban Cherry Hill, N.J., where state parental notification laws aren't as strict as Pennsylvania's.

ABORTION SERVICES

SURGICAL ABORTION from 4-20.5 weeks

At the initial visit, a pregnancy test, ultrasound and informed consent will be obtained. Ultrasound is performed to assure an intrauterine pregnancy and give us an accurate size. This evaluation gives us an opportunity to review each patient's medical history and current health status. In some cases, a hospital procedure may be recommended. The second visit will be for the actual procedure.

Our office procedures are performed under local anesthesia and hospital procedures are performed with sedation or under general anesthesia.

Another "Partner" works with Benjamin who performs abortions at his [private office Bruce Berger, MD](#) where he does abortions thru 20 weeks.

In the fall of 1997, Plaintiff was allegedly raped and became pregnant. Plaintiff stated that she was advised by her friends and neighbors to terminate the pregnancy. Although she felt pressured by this advice, Plaintiff sought assistance from her health insurance carrier, Keystone Mercy Insurance, which referred her to Defendant Berger. On November 24, 1997, Plaintiff, then fourteen (14) weeks pregnant and accompanied by a neighbor, went to Defendant Berger's office for a consultation and examination in anticipation of a therapeutic abortion. Defendant Berger explained the procedure to Plaintiff, including the risks and complications associated with an abortion. Twenty-four hours later, on November 25, 1997, Plaintiff returned and Dr. Berger performed the abortion as an outpatient. Following the procedure and before leaving the office, Plaintiff and Defendant Berger discussed the different birth control methods, including tubal ligation. Plaintiff expressed an interest to undergo a tubal ligation. Defendant Berger advised her that there was a thirty-day waiting period and that the earliest she could have the procedure would be after December 25, 1997. Defendant Berger testified that he then informed Plaintiff of the complications and risks of the tubal ligation procedure, provided a consent form to take with her, and advised her to call his office for an appointment should she decide to undergo the procedure.

[Here](#) On December 29, 1999, Antoinette Hartdegen filed a medical malpractice action against Appellee, Bruce Berger, M.D. ("Berger")¹ claiming that Berger

failed to obtain her informed consent before performing a tubal ligation/sterilization procedure. Bruce Berger performed the surgery after he performed an abortion because she claimed she was a rape victim. After the abortion she received the Tubal Ligation and suffered complications which resulted in a hospital stay for emergency bowel repair. The jury ruled in favor of Berger.

Apparently, Plaintiff called for an appointment, and on December 29, 1997, Plaintiff was examined by Defendant Berger, at which time he again explained the tubal ligation procedure, including the risks, complications and alternatives, had her sign the consent form, and referred her to Albert Einstein Medical Center (AEMC) for pre-op procedures. On December 30, 1997, prior to the procedure, Defendant Berger consulted with Plaintiff and was assured that Plaintiff wanted to undergo the tubal ligation. Thereafter, Defendant Berger performed a laparoscopic tubal ligation.

Unfortunately, complications developed after Plaintiff was released from the hospital. On December 31, 1997, Plaintiff reported to the AEMC emergency room with complaints of pain, vomiting, and diarrhea. Plaintiff was diagnosed with post-operative pain status post tubal ligation, and released. On January 3, 1998, Plaintiff was seen by Defendant Berger at his office with complaints of continuous and increased pain. He immediately referred her to AEMC, where she underwent an emergency bowel repair, which had perforated during the December 30, 1997, tubal ligation procedure.

As the result of the perforation and subsequent bowel repair surgery, Plaintiff has a distended abdomen and numerous deforming scars. In addition, Plaintiff complains of experiencing difficulty in lifting, bending, squatting, twisting, and bouts of nausea, vomiting, diarrhea, and bleeding.

One more possibility is A 2010 Board Member is [Mark B. Woodland, M.D](#)

ANOTHER would be [Paul Copit, MD](#) who worked for Planned Parenthood in 2006 taking in \$61,300. He appears to still be listed as with PP. [Copit](#) supervised Anthony Trip after he was disciplined by the state. ([here](#))

We may never know just who Charles Benjamin was referring to when he testified that his "Partner" was involved in the death of an abortion patient. But, one thing we do know is that women DO DIE from abortions and that is not a rare event. For proof go to [SafeandLegal.com](#)
