About

Experienced and compassionate women's healthcare provider and educator, and board-certified physician with graduate degrees in public health and clinical informatics. Background in public health research, decision modeling, and pragmatic analysis of existing data. Trained in curating clinical workflow, data capture, and data visualization to accelerate population health management. Committed, innovative, intellectual, and adaptable with excellent interpersonal skills.

Key Skills Include:

- Empathetic and engaging communication
- Innovative problem-solving and strategy
- Pragmatic analysis of electronic health record and claims data
- Health services research and development
- Women's health clinical care
- Trauma-informed care of women veterans
