Botched Procedure Causes Hemorrhage at FL Abortion Clinic

Previously on our blog we posted this: Pro-lifers outside the **All Women's Health Center** in Altamonte Springs report that on November 14, 2012 an ambulance arrived to the Florida abortion clinic:

Pro-life counselor Michele Herzog stated, "While we were at AWHC this morning, November 14, an ambulance and a fire truck drove down the street and ended up at the AWHC abortuary. As you can see a young lady was transported to the hospital."

Herzog continues, "The medical assistant is holding up a sheet so we wouldn't see the girl on the stretcher, with Melvin guarding the scene. The young lady is being taken out the back door. We pray for this young lady that was taken to the hospital and we also pray for this medical assistant looking at us. She knows the truth about what abortion really is and she knows that it is not safe either."

But Now, **Operation Rescue** has released the 911 Audio of the call:

911 Hemorrhage After Botched IUD Insertion ...

Operation Rescue recently obtained the 911 recording and Computer Aided Dispatch Transcript that confirmed the nature of the woman's injuries and produced a video that includes the emergency call recording.

Michele Herzog of Pro-Life Action Ministries, who witnessed the incident, told Operation Rescue that the clinic's security guard told her that the injured woman was *"an employee that was pregnant and she started bleeding."* **That story was completely refuted by the 911 communications that stated specifically that the woman was a patient who was not pregnant and hemorrhaged during an attempt to insert an IUD.**

An IUD, (Intrauterine Device), is a method of birth control that consists of a t-shaped object that is inserted into the uterus that prevents implantation of a growing human blastocyst, or baby at the earliest stage of development. IUDs are considered to cause very early abortions and are not a true contraceptive, because it causes the death of a growing human being. True contraceptives prevent the egg from being fertilized.

"In order to cause the heavy bleeding, it is likely that the IUD perforated the uterus. This is a very dangerous complication that would likely require emergency surgery to correct, according to our research," said Troy Newman, president of Operation Rescue and Pro-Life Nation.

"This incident just further illustrates the dangers that lurk at our nation's abortion clinics. There is no such thing as a 'safe' abortion clinic. In our years of experience, we have never found one that follows the law."

Case in point:

In 2009, Agency for Health Care Administration found several deficiencies at the abortion clinic (Report [here](#))

Other All Women's Locations have also had deficiencies sited during abortion clinic inspections:

[Gainesville](#)

[Jacksonville](#)

Abortionist **Gary A Dresden** is listed as the doctor and Officer for the clinic ([Here](#))

According to the Florida Medical Board, **Dr. Gary Dresden** has a complaint on file ([here](#)) **Case**

#61535 Suspension-Other Penalty Imposed

Gary Dresden is originally from Long Beach, New York. He attended McGill University in Montreal, Canada and Medical School in Bologna, Italy. He

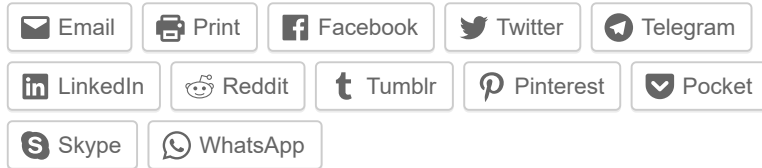

moved to St. Petersburg Florida for his residency and practiced OBGYN in St. Petersburg, FL with Dresden, Ticktin, Klein and Sibley MD PA. He currently owns and operates several abortion clinics in Florida and [New York](#).

Dresden once [stated](#), *"Like most everybody, I want to be loved, listened to and heard. But I also want to be remembered, without my ideas and deeds being lost in the swirling winds of time. As an Obstetrician and Gynecologist, I have been proud of my contribution, the difficult deliveries, the difficult surgeries, and concomitantly, the lives that I've touched and saved. But the clarity of these actions fade with the years and the feelings go unremembered, lost forever in the bottomless wastebasket of forgotten memories."*
