Dr. Michael Morris MD

August 4, 2013 ·

I have found so many people all over the world not able to live their lives because their docs won't treat their obvious hypothyroidism because of normal thyroid blood tests. These same docs know little to nada about t3 which just flat-out fixes most thyroid issues, which include chronic fatigue and fibromyalgia I have found. Because of huge # of people involved and virtually no one knowledgeable enough about t3 to help them, I will fix anyone who wants fixing from right her... **See More**

July 26, 2013 ·

I have heard from so many people worldwide who can not get properly treated with T3 at home, I've decided to treat whomever needs it, wherever they are. I also started a yahoo support group T3 ONLY if you feel like venting.

Just tried to pass on some good news to Overeaters Anonymous but got tarred and feathered and run out of town on a rail. This is not an attempt to sell some diet plan or book. A huge percentage of dramatically overweight people are hypothyroid with normal blood tests so medicine has wrongly told them there's nothing wrong with them-eat less and exercise more. How's that working for you America? This is nor some sick joke or self-serving ego trip. And like I told Overeaters, if you don't believe me, it's your loss, not mine.

While using T3 for weight loss I accidentally eliminated chronic fatigue and much of fibromyalgia pain with lower doses than needed for weight loss.

Dr. Morris:

Very seldom do I run across an article or miracle cure on the internet but here goes. I live outside of Philadelphia and have been ill since I was 30 however I fought through the misery of life while being an executive from Long Island, NY. I was the type A, successful executive. At thirty I knew I had hypothyroidism, and was not believed until the level reached a point that was coined "Off the Wall." I do not believe in 1988 that any doctor wanted to reveal just ... I am just a 68 year old simple old-time back woods country doctor, MD, from the mountains of southern California. Just a nobody from nowhere. I am not an endocrinologist, or any other kind of fancy expert about anything (except ADHD maybe), but I did have excellent Ivy League medical training way back in the day, now long gone, when excellence was the only acceptable standard directing the practice ...of medicine.

These days it's HMO. Anybody know... **See More**
