Overview

Utilizing basic science methods, clinical approach and community engagement, the major focus of RTRN Women and reproductive health cluster will be to identify and explore methods to better diagnose and treat major health problems impacting minority women and to disseminate pertinent disease-related information throughout the communities that need it the most.

Objectives

Promote greater awareness of women's and reproductive health among the minority population through community engagement.

Facilitate studies that investigate the diseases that disproportionately affect minority women and their reproductive health.

Develop better diagnostic and treatment of health disparities in minority women like breast and cervical cancer, infant mortality and reproductive health.
