Straub / Services / Obstetrics & Gynecology (OB/GYN)

Obstetrics & Gynecology (OB/GYN)

From birth control through pregnancy and childbirth to menopause, our OB/GYNs help their patients with reproductive health care throughout their lives.

Our OB/GYNs treat an array of conditions, including infertility, menopause, hormonal disorders, sterilization or termination of pregnancy, reproductive-related cancers and incontinence. We also coordinate prenatal genetic counseling.

Our board-certified OB/GYNs can perform laser surgery, laparoscopy and colposcopy and provide surgical treatment of infertility and tubal reconstruction surgery.
