# Women's Services

We specialize in providing caring, coordinated and comprehensive health services to women of all ages. From breast health and well-woman care to pregnancy, heart health, cancer care, gastroenterology and senior needs, we recognize that women's bodies are different than men's – and their medical care should be as well. We strive to keep women healthy for life.

## Women's Services at Straub

Straub complements Kapiolani's services, focusing on a woman's adult health needs, such as cardiology, gastroenterology and geriatric medicine.

Straub's OB/GYN physicians provide general obstetric and gynecological care, including family planning services.

In addition, our physicians provide infertility evaluation, sterilization or termination of pregnancy, management of high risk obstetric patients, management of diabetic pregnancies, and services for reproductive-related cancer or hormonal disorders. Prenatal genetic counseling is available by referral.

Straub also offers specialty consultations in urogynecology (incontinence problems in women). Straub's board-certified OB/GYN physicians perform laser surgery, laparoscopy and colposcopy procedures; treat menopause and its related problems; provide hormone replacement therapy; and provide surgical treatment of infertility and tubal reconstruction surgery.

**Straub Women's Health: 1-808-522-4000 or 1-800-232-9491 (toll-free)**
