

Name: Erna Fisher

Details: On March 30, 1988, Erna was having an abortion at the office of Dr. Dennis W. Miller. Erna's mother, who was holding her hand, said Erna jerked upright and went rigid. A medical assistant ran for smelling salts. Incredibly, Miller continued with the abortion while Erna choked to death on her vomit. He later admitted that he gave her a painkiller that he knew could cause vomiting and failed to ask when Erna had last eaten. She was 18 years old at the time of her death.
