Over the past 2 weeks I have received numerous calls from pharmacies to verify Promethazine with codeine. Although I write for this medication on occasion, some of the names did not match my records. There is a distinct possibility an Rx pad was discarded into the recycling bin accidentally.

I work at White Oak Medical Center, Montgomery County, Maryland and Calvert health Medical Center., Calvert county, Maryland. Someone broke into my car which was parking in front of my house in Fairfax County Virginia and stole 2 or 3 prescription pads. The prescription pads did have my DEA number. I already reported the incidence to Fairfax County police department and the DEA

Cleaning service broke into a locked box and stole petty cash as well as two prescription pads. One pad was pre-printed with ibuprofen 800mg #30 and the other was pre-written with promethazine 25mg #10. None of the prescriptions were signed. In the last three days we have received five verification calls from CVS pharmacies in the northern Maryland area for fraudulent prescriptions for promethazine with codeine and Z-packs. None of the prescriptions that were stolen were pre-printed with either of those medications. Police report was made on 3/20/2020

8/6/2019 8/6/2019 Christopher Earley Neurology/Sleep Clinic
 410-550-7925
 Maryland County: Baltimore City
 Zip Code: 21224
 Kaiser Permanente pharmacy compliance department called Johns Hopkins Bayview Medical Center because on 8/5/19 they received a suspicious prescription for oxycontin written on Dr. Earley's prescription pad. The pharmacist at Kaiser was suspicious, tried to call the clinic to verify. Per Nusheen, the pharmacist called what seems to be a Byaview number and also called again through the switchboard. He had confirmation that the prescription was valid each time. The pharmacist was still suspicious and requested to speak to Dr. Earley. Someone impersonating Dr. Earley confirmed that the prescription was correct and valid. The pharmacist was still suspicious and did not fill the prescription. All this occurred around 1300 8/5/19. We are still waiting for copies of the forged prescription at JHBMC to follow up. Kaiser has reported the fraudulent prescriptions on their end as well. They will flag all Earley prescriptions and verify with a direct number we provided to them. The clinic confirmed not receiving any phone calls yesterday to verify prescriptions. We are also flagging the associated patient's chart in our electronic medical records. It seems that a prescription pad has been stolen, but not noticed by the prescriber. The inpatient pharmacy at JHBMC has reached out to the clinic/provider to remove any remaining physical pads as part of the internal investigation. The provider currently primarily uses the electronic medical record to send his prescription orders. This is done primarily electronically, or at times, printed out from the system directly if needed. The fraudulent prescription was written in an "old" prescription pad that is no longer being used. Can a communication be sent out alerting all Maryland pharmacies about the stolen pads /

fraudulent prescriptions that are using Dr. Earley's name? If that was possible, I would also recommend including a direct number where prescriptions by Dr. Earley could be confirmed/verified (410-550-7925).

The doctor had her prescription pad in her desk drawer. When she reached for it, it was not there. In looking for it, she found remnants from the prescription pad. She reported it to the office manager and the manger has contacted local police to file a stolen report and to obtain a case report number. Local pharmacies have been contacted as well.

Zip Code: 20743

Patient - John Larry Jones came in for emergency visit - reviewed his status -was given Rx Motrin 800mg 20tabs and Penicillin 500mg 28 tabs. Patient left and stole an entire prescription pad - presented to CVS on Minnesota Ave. Wash, DC (202) 396-2331 for Percocet 30. Pharmacist called office to confirm this Rx. Office Manager inform them this was not what was given. The patient then gave the pharmacist crumbled up Rx for the Motrin and Penicillin. The office then called back to request the Rx not be filled. I called Maryland DHMH to report this incident and spoke with Ms. Lisa Guy - Division Chief of Reinforcement.

8/29/2018 8/31/2018 Steven John Lahti, Ashkot Sergeevich Medicine
Kotcharian
410 502 6112
Maryland County: Baltimore City
Zip Code: 21287

Numerous fraudulent prescriptions have been passed at pharmacies located on the east side of Baltimore County over the past several weeks. The prescriptions are allegedly from Johns Hopkins Medicine and have been written for 5, 10 and 15 mg Oxycodone. The doctors being targeted are Steven John Lahti, MD and Ashot Sergeevich Kotcharian, MD. Several different patient names have been used on the prescriptions. The following names have been identified at this time: Kevin Snead, Cekiara Williams, Anthony K. Wallace, and Terry McLain. It appears that the phone numbers printed on the recovered prescriptions are not the phone numbers associated with the doctors. If you need to verify a prescription that you suspect is fraudulent, conduct a Google search or check your contact lists to identify the proper phone number associated with the doctor. If you do receive a prescription that you suspect is fraudulent, please attempt to contact the diversion investigator assigned to your pharmacy immediately. If you cannot reach the investigator assigned to your area, please call me. At a minimum, please make a copy of the prescription and attempt to obtain identification from the individual that passed the prescription and/or the individual that is attempting to pick it up. If the information involved in this investigations sounds familiar and you have received one of these prescriptions and have not reported it, please report it to your diversion investigator immediately. Your assistance in this investigation is greatly appreciated.

8/28/2018 8/28/2018 Nichole R. White Family Nurse Practitioner
Nichole R. White
Maryland County: Anne Arundel
Zip Code: 20724

confirmed that Mr. Gbadomosi was no longer employed by the practice. The practice was not aware that Mr. Gbadomosi possessed prescription pads. A police report was filed with the Prince George's County police on May 30, 2018.

4/9/2018 4/16/2018 Kristin Reavis, MD Family Medicine
