My abortion procedure was the result of a rape. I told them, they did nothing. The day of my surgery, they let him drive me home. After I asked them not to. Not only because I knew my assaulter didn't have a license but also because of the abuse endured. They canceled my planned ride with friends per his request and handed him my keys. On the way home.. he pushed me out of the car only hours after my abortion procedure. This place has 0 respect for women. there were about 6 of us in a tiny room waiting to be called back like a slaughter house. DO NOT GO HERE!!! They literally enabled my abuser to continue abusing me. They refused to call the cops during my ultrasound due to "not wanting to cause a scene at the office" I am sharing to help a vulnerable woman avoid further trauma.

I'm not sure where I should start about this awful place. Maybe ill start with the lack of confidentiality and respect. We were treated like moving cattle waiting to be put down. The doctor came in, wearing no mask, no gloves and he kept rubbing his face and speaking as if he was annoyed. He looked very drained in the face and very dirty. He started off by sitting us down and telling us how he doesn't need this clinic because he has his own practice but he do this because he has free time that allows him too. He kept mentioning how he gets paid regardless of what procedure we choose to have. He also spent majority of the "orientation" trying to convince the entire room how much the pill doesn't work. He kept pushing for everyone to let him do the surgical procedure because he had done so many and he was just that good. He mentioned that with the pill it saves him time and he's not responsible for anything that happens to you. He also states how he don't care if the pill works because you will need to come back if it don't and he will get twice the pay. He spoke about how many D and C (dilation and curettage) procedures he had done and how this would be the only way to truly ensure the pregnancy was ended. He kept saying how it wouldn't hurt and how most of his patients have it done awake but I highly doubt that's true because that type of procedure is supposed to be under general or local anesthesia. If you are young and impressionable please don't go here! If you are under 10weeks just get the pill and run, run for the hills! Don't let this strung out "Dr." do anything with your body. It's almost like he's just experimenting and he really need lab rats. This man is mildly obsessed with you letting him do the procedure and he comes off so judgement all if he finds out that you still want the pill despite his efforts of trying to convince you how unsafe it is when honestly it's very safe and works the exact same. I believe all his abortion pill failure stories were made up completely just too get between our legs. This place is unprofessional and unsanitary. There's absolutely no privacy what so ever! 6ft distance? Not in here. We are all huddled up speaking about this very fragile sensitive topic together. All the positive reviews are old and seems fake to me because there is no way that a woman that just experienced this clinic will ever suggest another woman to go there especially at such a vulnerable time in their life. Find another place, find a more understanding place and if you must go here and you are under 10weeks i again encourage you just to take the pills and run. Something isn't right about this "doctor" and I want to let as many women know as possible, you aren't alone and this isn't the place for you.

It's already hard enough walking into an abortion center to deal with this...The doctor here is so unprofessional. he read off the risks like he was in a commercial. it was so fast i didn't understand him and when i asked him to repeat himself he insisted he doesn't have time to "dumb it down for every slow woman" i've never been treated with as much disrespect as i was here. do not come here. this man does not care about women

Receptionist was rude. Obviously I'm sensitive coming to this place in the first place, the least you could do is be nice. Doctor guilt tripped me for not being on birth control and the procedure itself was painful and I remember everything even though I was told I wouldn't remember a thing. I screamed and I cried and then was left on a bed with no pillow sweating. It was a very uncomfortable experience. Regardless, I won't be coming back. But I seriously would not recommend this place to anyone. Women deserve to be treated with respect when going through such a traumatic experience.
