
IMPORTANT!

PLEASE READ

Kansas law requires the attached 24-hour consent form to be **COMPLETED IN FULL at least 24 hours prior to arriving for your appointment.** There are very specific guidelines necessary to follow to ensure the consent form is considered valid under this law.

Please follow the below steps *closely*:

1. Print the consent form on WHITE PAPER and do not change the font or font size.
2. The form must be printed in BLACK INK.
3. Read and INITIAL EACH SECTION.
4. SIGN YOUR NAME on the last page of the consent form. Electronic signatures cannot be accepted.
5. If you are a *minor* (under the age of 18), A PARENT MUST ALSO BOTH INITIAL AND SIGN the consent form.
6. WRITE THE TIME that you signed the consent form INCLUDING CIRCLING “AM” OR “PM”.
7. Bring the completed form with you to your appointment. *It is important to bring all pages of the consent, not just the signature page.* DO NOT MAIL THIS FORM.

ALL OF THE ABOVE STEPS NEED TO BE COMPLETED FOR THE CONSENT FORM TO BE CONSIDERED VALID. If even one portion is not completed as per these instructions **OR** if the consent form is not completed *at least 24 hours prior to your appointment* **YOUR PROCEDURE WILL NEED TO BE CANCELLED AND RESCHEDULED.**

PAYMENT USING A CREDIT CARD IN SOMEONE ELSE’S NAME: Please note that for abortion procedures, Kansas law also requires that the individual whose name is on the card is present at the appointment and shows valid photo identification. If the person is not present or does not have photo ID, *your procedure will need to be rescheduled.*

We are here to provide the most seamless and quality healthcare possible and want to avoid any situations in which rescheduling your appointment would be necessary.

Kansas 24 Hour Informed Consent

To comply with Kansas Law effective July 1, 1998 (amended July 1, 2009; July 1, 2011; July 1, 2013; July 1, 2017), you must *receive and complete* this Informed Consent *at least 24 hours prior to your procedure*. The State-written materials referenced within this form are available to you online and at Comprehensive Health of Planned Parenthood Great Plains (CHPPGP).

____/____ 1. Estimated Gestation of Pregnancy: Until you have a sonogram to determine how far along the pregnancy is, the best way to estimate the gestation is by the date of your last normal menstrual period.

If you believe your last normal menstrual period started:	Then you are probably about:	If you believe your last normal menstrual period started:	Then you are probably about:
4 weeks ago	4 weeks pregnant	14 weeks ago	14 weeks pregnant
5 weeks ago	5 weeks pregnant	15 weeks ago	15 weeks pregnant
6 weeks ago	6 weeks pregnant	16 weeks ago	16 weeks pregnant
7 weeks ago	7 weeks pregnant	17 weeks ago	17 weeks pregnant
8 weeks ago	8 weeks pregnant	18 weeks ago	18 weeks pregnant
9 weeks ago	9 weeks pregnant	19 weeks ago	19 weeks pregnant
10 weeks ago	10 weeks pregnant	20 weeks ago	20 weeks pregnant
11 weeks ago	11 weeks pregnant	21 weeks ago	21 weeks pregnant
12 weeks ago	12 weeks pregnant	22 weeks ago	22 weeks pregnant
13 weeks ago	13 weeks pregnant		

The final determination of gestation of the pregnancy will be made by the CHPPGP doctor upon ultrasound examination. If you are between 4 - 13 weeks, the common procedure is Vacuum Aspiration. Medication Abortion is available for pregnancy termination between 4 - 11 weeks. If you are between 14 - 21.6 weeks, the most common procedure is Dilation and Evacuation.

____/____ 2. Types of Abortion Procedures:

First Trimester (4-13 weeks) Vacuum Aspiration – This abortion procedure begins with a local anesthetic given to numb the cervix. The cervix is then widened using dilators, which are tapered rods that gradually increase in size. The physician inserts a small tube (cannula), which is attached to an aspiration device. The device's suction empties the contents of the uterus through the tube. The physician may check the

walls of the uterus with a curette. The entire procedure takes less than 10 minutes. Sensations will vary, but they are mostly described as cramping or discomfort, which generally subsides within a few minutes after the procedure is over.

Early Nonsurgical/Medication Abortion (4-11 weeks or up to 77 days) – While in the clinic, a drug, Mifepristone, is given to stop the development of the pregnancy. One to two days later, at home, a second drug (Misoprostol) is taken, causing the uterus to contract and expel the embryo and placenta. During this process cramping and bleeding will occur.

Second Trimester (14-21.6 weeks) Dilation and Evacuation – During the initial appointment, the osmotic dilators are inserted into the patient's cervix to begin the process of slow and gentle dilation of the cervix. The abortion procedure occurs several hours later, or in some cases one or two days later and involves removal of the pregnancy with forceps. A suction instrument is used to clean the uterus, and a curette is used to check the uterine walls. Patients are then monitored in recovery for at least 2 hours following the procedure.

Complications of Abortion – Possible complications include: blood clots accumulating in the uterus, requiring another suction procedure; infections, most of which are easily identified and treated if the woman carefully observes follow-up instructions; a tear in the cervix, which may be repaired with stitches; perforation of the wall of the uterus and/or other organs, which may heal themselves or may require surgical repair or, rarely, hysterectomy; and abortion that is not complete or that does not end the pregnancy may require the procedure to be repeated; excessive bleeding due to failure of the uterus to contract, which may require a blood transfusion; death. In the second trimester, risks increase with every week of gestation.

____/____3. Risks with terminating a pregnancy vs. carrying a pregnancy to term: There is approximately 1 death for every 167,000 women who have legal abortions, and these rare deaths are usually of adverse reactions to anesthesia, heart attacks, or uncontrollable bleeding. The death rate for a woman carrying to term is about 10 times greater.

____/____4. Your blood type will be determined the day of your appointment. Approximately 15% of the population is Rh-negative. All Rh-negative women will receive an injection of Rhogam to prevent problems with future pregnancies such as miscarriage, severe fetal anemia or permanent fetal damage. There is no extra cost for a Rhogam injection.

____/____5. State-written materials are available in printed form and online which list agencies which offer alternatives to abortion with a special section listing adoption services and providers of free ultrasound services, provide detailed information on the availability of assistance for prenatal care, childbirth, perinatal, and neonatal care, and contain additional State-mandated information. A link to the State written materials is available on the CHPPGP homepage, as required by law. The information stated there does not necessarily reflect current medical opinion or that of CHPPGP.

____/____6. Alternatives to abortion include parenting, foster care and adoption. For information about perinatal resources in Kansas, visit www.kdheks.gov/cf/maternal.html or contact the Kansas Department of Health and Environment's Perinatal Health Consultant at (785) 296-1307. For information about national perinatal resources, visit the National Perinatal Association at www.nationalperinatal.org and Bright Futures at www.brightfutures.org.

____/____7. You are free to withhold or withdraw your consent to the abortion procedure at any time prior to the dilation of the cervix during a surgical abortion or at any time prior to the administration of the first medication during a nonsurgical abortion. Consent may be withheld or withdrawn without affecting your right to future care or treatment and without the loss of any state or federally funded benefits to which you might otherwise be entitled.

____/____ 8. Provider information by CHPPGP location is below. The United States Supreme Court recently struck down a Texas law requiring doctors providing abortion to have admitting privileges at a hospital within 30 miles, concluding there was no evidence it advanced women's health and that abortion is a safe procedure with low rates of serious complications.
